## ABOUT ME

Software Developer with hands-on experience in Python, C#, Java development, Artificial Intelligence, Machine Learning, Deep Learning, API integration, data processing, and software testing. Experienced in developing and experimenting with machine learning models using TensorFlow, PyTorch, and scikit-learn, as well as building AI-powered applications using APIs and LLM technologies. Strong interest in developing reliable software systems and applying AI and machine learning to practical technical problems.

---

## EDUCATION

Rosebank College | 2022 - 2024

### Diploma in Information Technology, specializing in Software Development

Software Development, Computer Science, Programming, SQL and Databases. Software Testing, Web Development, Data Structures and Algorithms. IT Project Management and Azure Devops (CI/CD Pipelines).

---

## WORK EXPERIENCE

Muluma Management Consulting Group | Jan 2025 - Present

### AI software developer Intern

- Contributed to the development and testing of an AI-powered software solution for processing structured and unstructured financial documents.
- Worked with Python, APIs, SQL Server, and SAP integrations as part of the software solution.
- Developed and refined logic for extracting, validating, and processing data from documents.
- Tested APIs and AI-driven application functionality to identify defects and unexpected system behaviour.
- Investigated errors and edge cases and contributed to improving application reliability.
- Worked with structured data and validation rules to support accurate downstream processing.
- Collaborated with technical and business stakeholders to translate requirements into software functionality.

---

## CORE SOFTWARE SKILLS

- |                                   |                                   |                                 |
|-----------------------------------|-----------------------------------|---------------------------------|
| • Python Software Development     | • API Development and Integration | • Debugging and Troubleshooting |
| • Machine Learning Development    | • Data Processing                 | • Software Testing              |
| • Deep Learning                   | • SQL and Database Development    | • System Integration            |
| • Software Design and Development | • Algorithms                      | • Technical Problem Solving     |

## TECHNICAL SKILLS

- Adaptability & Continuous Learning
  - Strong Attention to Detail
  - Analytical & Critical Thinking
  - Ability to Learn New Technologies Quickly
  - Research & Experimentation
  - Strong Troubleshooting Skills
  - Team Collaboration
  - Independent Working
  - Time Management
  - Ability to Work Under Pressure
  - Logical & Structured Thinking
- 

## CERTIFICATIONS

- Microsoft Certified: Security, Compliance, and Identity Fundamentals (SC-900)
  - Microsoft Certified: Azure Fundamentals (AZ-900)
  - Building with the Claude API
  - Claude Code in Action
  - Introduction to Model Context Protocol
- 

## PROJECTS

Completed for Current role

- SABC AI Chatbot

Technologies: Python, AI/LLMs, APIs, SQL, SAP

Developed and tested an AI chatbot for processing information and supporting automated workflows. Worked with AI APIs, data extraction, validation, system integration, and application testing.

- VitaQueue

Technologies: Python, Node.js, SQL, APIs

Developed a queue-management application using Python and Node.js, with SQL for data management and APIs for system integration. Implemented application functionality, data processing, and API communication.

Completed in college | <https://github.com/Cardicia101/my-projects>

- RecipeMaster – Academic Project | 2024

Technologies: C#, WPF, SQL

Developed a recipe management application using Object-Oriented Programming, including CRUD operations, search functionality, database integration, and a WPF graphical interface.

- Agile & DevOps Team Projects | 2022–2024

Technologies: Git, C#, Java, ASP.NET Core, HTML, CSS

Participated in collaborative software projects using Agile/Scrum and DevOps practices, applying source control, collaborative development, and software delivery practices.

- Database Management System – Academic Project | 2022

Technologies: SQL, Relational Databases

Designed and implemented a normalized relational database using ER modelling and third-normal-form principles, including CRUD operations and data management.
